

Mainstream Economists Contend That As Stabilization Tools

Mainstream Economists Contend That As Stabilization Tools - The mainstream view is that macro instability is caused by: significant changes in investment spending. According to mainstream macroeconomists, U.S. macro instability has resulted from: investment "booms" and "busts" and, occasionally, adverse aggregate supply shocks. Mainstream economists contend that, as stabilization tools: both discretionary fiscal policy and monetary policy can be effective if appropriately used. Final M&B 136 terms³. Mainstream economists contend that, as stabilization tools: a. discretionary monetary policy is effective, but discretionary fiscal policy is not. b. both discretionary fiscal policy and monetary policy can be effective if appropriately used. Macroecon chapter 36 review. The mainstream view is that macro instability is caused by: significant changes in investment spending. According to mainstream macroeconomists, U.S. macro instability has resulted from: investment "booms" and "busts" and, occasionally, adverse aggregate supply shocks.
